**Plenary Lecture**

-脑子的健康
-脑和行为
-认知可塑性
-记忆和学习
-结构和功能

**Special Lecture**

- Science and society: a critical role in understanding and addressing climate change
- The role of the brain in addiction and recovery
- The impact of social media on mental health
- The connection between nutrition and brain function
- The future of neuroscience in personalized medicine

**Poster Session**

- Poster sessions provide opportunities for presenting results and having discussions with experts in the field.
- Each session includes various topics such as cognition, perception, and emotion.
- Attendees can choose to participate in either the morning or afternoon sessions.

**Networking Event**

- A valuable opportunity for networking and building connections within the neuroscience community.
- Participants can engage in discussions with leading experts in various fields.

**Mini-Conference**

- Mini-conferences cover specific areas of neuroscience, allowing for in-depth discussions and presentations.
- Topics range from basic research to translational applications.

**Program Highlights**

- Our program features a diverse range of topics and sessions, designed to cater to all interests and levels of expertise.
- From cutting-edge research to practical applications, we offer a comprehensive experience for all attendees.
- Join us for a unique and informative journey into the fascinating world of neuroscience.
